

Opportunity for Students at Canada East Spine Centre

- Canada East Spine Centre is a high-volume research group that focuses on Spinal Pathology and Spine Surgery Outcomes and on improving patient outcomes (reducing pain, improving mobility, and improving patient's quality of life).
- Our volunteer program was designed to give students an opportunity to learn about how medical research is practically conducted. This means you will learn the ins-and-outs of how medical research is conducted on a day-to-day basis.
- **The Canada East Spine Centre is currently taking on 8 new Volunteer Research Assistants (2 positions are designated for bilingual students in English/French)**
- **If you are interested in becoming a volunteer research assistant with Canada East Spine Centre, you may forward your CV to Eden Richardson at cescvolunteers1@gmail.com.**
